Steele-Waseca Cooperative Electric line crews in March and April will be con-ducting their yearly inspection of the co-op's power lines, including an in-depth inspection of their underground facilities. The co-op services the lines up to the meter pole at member service locations, so it may be necessary for Steele Waseca trucks to enter driveways during line inspections. The yearly check is mandated by the co-op's insurance provider. Thank you for your cooperation.

# separation plant

Courtesy: Great River Energy; plant to be powered by Steele-Waseca Cooperative Electric

onstruction is underway in Fari--bault on an independently owned and operated air separation plant that will be powered by reliable electric service from Steele-Waseca Cooperative Electric (SWCE), one of Great River Energy's (GRE's) 28 member-owner cooperatives.

Absolute Air—a consortium of five independent gas and welding supply distributors along with the Independent Welding Distributors Cooperativewill bring gases often used in the medical, electronic, food packaging, laboratory and metal fabrication industries to the Upper Midwest region beginning sometime in early 2021. Together, the consortium represents 30 business locations with more than 50,000 customers in a seven-state region.

"Now we're going to be making a bulk of those gases ourselves...It's kind of a disruption to the normal course of business, and the eyes of the industry are on us," said Brad Peterson of Mississippi Welders Supply, one of the five distributors that created Absolute Air, at the project's groundbreaking. "The big guys are watching to see if we stumble, and the little guys are watching to see if this is a replicable model that they can go out and reproduce. I think we're up to the challenge; we're ready.'

Peterson said the plant is expected to be an economic driver for the region as many larger businesses seek out collocation opportunities "since these gases are so critical to their process."

The Northern Industrial Park site chosen by Absolute Air was identified after GRE Economic Development Services

Representatives from the companies that make up Absolute Air are pictured at the plant's groundbreaking event last year.

Manager Tom Lambrecht suggested Faribault as a location that would meet their needs. As a cooperative, GRE is committed to the sustainable development of communities served by its member-owners, and works with local and state organizations to assist businesses planning to locate or expand in these areas. The site, served by SWCE, ended up not only suiting the plant's infrastructure requirements but is also centrally-located for all five companies invested in the project. 26333

"It was very important to have good electrical power, get a good rate and [find] a good provider that has good reliability," Peterson said. "We're working with Steele-Waseca Cooperative Electric and Great River Energy. Thank you for being part of this."

reat River Energy is currently in Uthe process of seeking approval from city officials to build a new substation and install new overhead transmission lines to help SWCE deliver the robust electric power needed to serve the plant.

# Steele-Waseca Cooperative Electric conducting auditions for national anthem singer at co-op's 84th annual meeting

Selected performer earns \$100

C teele-Waseca is conducting audi-Ditions for the singing of, "The Star-Spangled Banner," at this year's annual meeting, Tuesday, June 2, at the co-op's headquarters in Owatonna.

Interested Steele-Waseca members or their dependents will need to audition before a panel of judges at the co-op or at an agreed designated location.

For those auditioning (whether solo, duet, etc.), you will be judged on your vocal performance, stage presence, and personality. You may schedule an audition by contacting Executive Assistant Jenifer Shimpach at Steele-Waseca. Auditions must be completed by Friday, April 24. Last year's selected performer/group is not eligible to participate the

year after being selected. 17647 The performer(s) selected will need to be available to sing the national

### Former Steele-Waseca Administrative Assistant DeAnn Kaplan dies at age 81

Former Steele-WasecaCooperative Electric Administrative Assistant DeAnn Kaplan died Sunday, Jan. 12, at the age of 81. DeAnn started

her career at Steele-Waseca on May 26, 1984, as a customer

service representative. She spent many hours answering phone calls and handling nearly all new and final accounts. She became administrative assistant in July 1996.

In her retirement article published in the April 2001 Sparks newsletter, one of DeAnn's most vivid memories dur-

the early 2010s.

ing her Steele-Waseca career was how all the employees cooperated during the 1991 ice storms while they worked long hours to get the members' power restored. When asked about leaving Steele-Waseca, DeAnn said, "It's been a great place to work. I'm going to miss the people, but I promise to come back and visit." DeAnn came occasionally to help in the Steele-Waseca office until

DeAnn was born Sept. 29, 1938, in Owatonna to John and Bonita (Hondl) Resler. She attended school in Owatonna and was married to Eugene Kaplan on June 16, 1955, at Holy Trinity Catholic Church of Litomysl. She worked alongside Eugene on the farm in rural Steele County before working at Jossparks • march 2020

tens. After that she started her career at Steele-Waseca.

She was a member of Holy Trinity Catholic Church of Litomysl, and the rural Homemakers Club. DeAnn taught religion class for many years, and enjoyed reading, traveling, and time with her family.

DeAnn is survived by her children: Shelbie (Ed) O'Brien of Lakeville, Sherrie (Steve) Meixner of Moorhead, Jerry (Barb) Kaplan of Blooming Prairie, Gary (Linda) Kaplan of LaGrange, Ga.; and Grant (Cathy) Kaplan of Medford; 10 grandchildren and 16 greatgrandchildren.

# **YOUR GUIDE TO ENERGY EFFICIENT APPLIANCES**

ENERGY STAR-certified dehumidifiers have more efficient refrigeration coils, compressors, and fans than conventional models, which means they remove the same amount of moisture but use nearly 30% less energy.

In fact, the annual energy saved by an ENERGY STAR certified dehumidifier could power your ENERGY STAR certified refrigerator for four months!

Freezers that have earned the ENERGY STAR are at least 10% more energy efficient than the minimum federal standard.

Replacing your old freezer with one that has earned the ENERGY STAR could save you

• ENERGY STAR certified refrigerators are about 9% more energy efficient than models that meet the federal minimum energy efficiency standard.

By properly recycling your old refrigerator and replacing it with a new ENERGY STAR certified refrigerator, you can save approximately \$50 a year.

# cookin' connection

### **Garlic Seasoned Baked Pork Chops**

#### **Christy Strobel**

2 Tbsp butter; melted	2 Tbsp milk
1 egg; beaten	pork chops
1 pinch garlic powder (or to taste)	

1 pinch seasoned salt (Lawry's; or to taste)

Preheat oven to 425°. Pour butter into a 9x13" baking dish, tilting to cover entire bottom of dish. Whisk egg and milk together in shallow bowl; dip pork chops into egg mixture. Transfer pork chops to the baking dish. Sprinkle pork chops with garlic powder and seasoned salt. Bake pork chops in preheated oven for 10 minutes, then flip chops and season the other side with garlic powder and seasoned salt. Cook until chops are no longer pink in the center, about 10 more minutes. An instant read thermometer should read at least 145°.

Please use a 3 x 5 card when submitting your recipe. The member whose recipe is published will receive a \$7 energy credit.

Steele-Waseca Cooperative Electric's solar subscribers will see a 10 kWh credit per panel on this month's statement for energy generated during January 2020. Learn more about community solar and The Sunna Project by visiting Steele-Waseca's website, swce.coop.

### Was your account number in Sparks?

Each month five account numbers are printed in *Sparks* and a total of \$35 in energy credits is divided among however many of those numbers are found. For example, if all numbers are found, a credit of \$7 will be applied to the members' following month's electric bills; or, if only one number is found, that member receives the full \$35 credit. Members finding their numbers who have a load management receiver on their dual fuel, electric water heater, air conditioner, or genset will receive an additional \$7 credit. When you find your number, phone our office no later than the 7th of the month following receipt of the Sparks, or the amount will be forfeited. 1021676

# How Do **Air-Source Heat Pumps Work?**

By transferring heat between a house and outside air, these devices trim electricity use by as much as 30 percent to 40 percent in moderate climates.

# **SUMMER**

### (1) Compressor

Increases refrigerant pressure to accept the maximum heat from the air.

#### (2) Condenser

Coils move refrigerant (and with it, hot or cold air) to or from outside air.

#### 3 Evaporator

Coils move refrigerant (and with it, hot or cold air) to or from outside air.

### (4) Air Handler

Fan blows air into a home's ducts.

#### (5) Reversing Valve

Switches the direction of refrigerant flow, changing the heat pump's output to hot or cold air (controlled by thermostat).
